USER'S MANUAL

WORSHIPER

v1.0.2

Contents

Introduction

Thank you for downloading Worshiper, the first ever all genre worship VST.

In this manual, we will guide you through every Worshiper controls.

System Requirements

Windows
Windows 7, 8, 9, 10 or 11
VST3 64-bit

Mac
Intel or M1(Native/Rosetta) processor
Mac OS X 10.7 or later
VST3, AU

Works with Ableton Live, Logic pro X, Cubase, Bitwig Studio, FL Studio, Reaper, Studio One, and many other DAWs that support VST3 or AU.

Installing Worshiper

Double click on the zipfile to open it. When opened select "Worshiper.AU" or "Worshiper.vst3" for Mac and "Worshiper.dll" for Windows and copy it on your Plugin folder.

On Mac :

AU component : (/Library/Audio/Plug-Ins/Components)

VST3 : (/Library/Audio/Plug-Ins/VST3)

VST2 : (/Library/Audio/Plug-Ins/VST)

On Windows :

VST3 : (\Program Files\Common Files\VST3)

VST2 : (\Program Files\Common Files\VST2)

or (\Program Files\Common Files\Steinberg\VST2)

32 bit on 64 bit windows.

VST3 : (\Program Files (x86)\Common Files\VST3)

VST2 : (\Program Files (x86)\Common Files\Steinberg\VST2)

Search carefully where your plugins are stored (are you maybe using the 64 or 32 bits version).

Don't forget to scan your plugin in your DAW.

Launch your DAW, select instrument plugin "Worshiper"
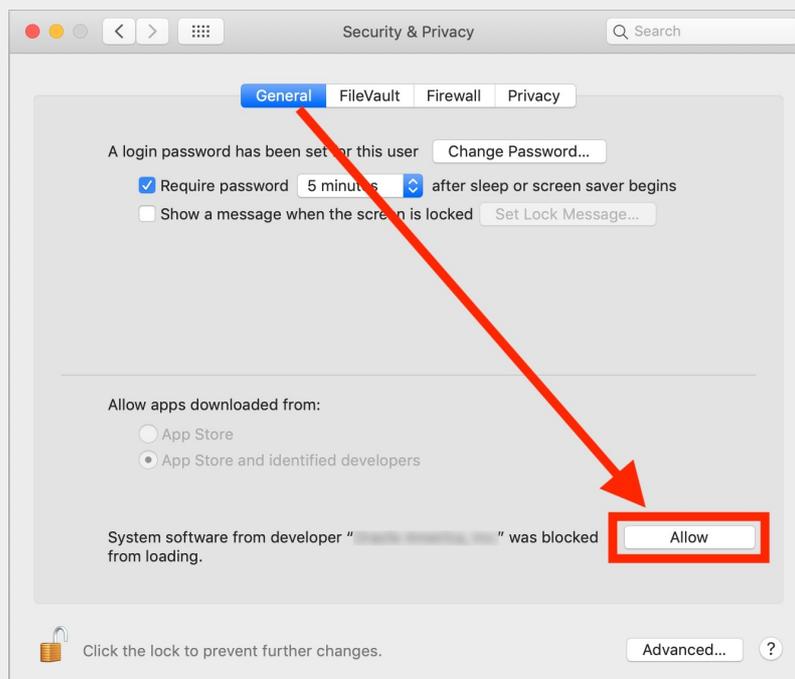

A note appears, click on the "Install samples" button.

If a message appears "Apple could not verify "Worshiper.component"

Go to System Preferences, then Security & Privacy

Unlock the padlock, and click allow

Back where we are. If it doesn't appear, continue to install the sample.

Select the ".HR1" file you have in "Sample archive folder" in Worshiper folder you have downloaded.

A new note appears "Please select the location where you want to install the samples". Click "OK" and select where you want to install it.

A success message appears "All samples were imported successfully. Please relaunch the instrument". Close the DAW, Relaunch the plugin.

FAQs

Q: Is Worshiper only made for worship ?

A: Yes, Worshiper is designed for worship, however you can use it for live and studio. The sounds are mixed to be incorporated in a studio session.

Q: Can I use it with other VST's, intruments ?

A: Absolutely, if you have a favorite key or synth, why don't use them to finetune the sound you want.

Q: What genre is it designed for ?

A: Mainly for worship, however you can find known sounds you have probably heard.

Q: Will there be other versions ?

A: Yes, we carefully take care of our users, so we are going to release updates depending on situations.
